

## **IN THE SPECIFICATION**

**Add the following paragraph on Page 5, after line 27 as follows:**

Figure 3 illustrates the installation steps of a broadcast data receiver.

**Page 7, after line 12 add the following new paragraph:**

Figure 3 illustrates the installation steps of a broadcast data receiver. Firstly, the broadcast data receiver is switched on 20 to allow the same to receive broadcast data. The power level of the incoming signals are measured 22 by measuring the content of the automatic gain control converters, thereby providing 24 an amplitude correction filter. The amplitude correction filter is selectively operated 26 depending on the power level measurements. The steps can be cycled so that the broadcast data receiver is responsive to fluctuations in incoming signal power levels.
